

Together we can stop the spread of COVID-19

COVID-19 is passed on by droplets from sneezes and coughs being inhaled or landing on hands and surfaces

1

If you're sick, stay home

2

**Keep a safe distance.
No physical contact**

3

Wash your hands often

4

Cover coughs and sneezes with a tissue or cough into your elbow

* Recommendations on safe distancing measures may vary. AEGIC believes 1.5m is a safe distance for milling, baking and noodle businesses. If your government or local authorities require wider distancing, please follow their recommendations.
